

## THE SMARTER ON-CALL SOLUTION

Study after study has proven that medical workers who are tired are not as clear thinking and may suffer lapses in judgment. **Don't compromise your patient's health and your Trust's reputation by using NHS 'moonlighters' and so-called 'NHS Equivalent' services.**

The best, most accurate reports come from fresh, alert radiologists working daylight hours in a collaborative team environment.

This is exactly how the TMC On-Call team operates, reporting from our state-of-the-art reporting suite in the heart of the Sydney CBD - whilst your local radiologists are sound asleep in bed.

TMC provides *genuine* additional reporting capacity into the NHS for out-of-hours reporting and ensures mandatory European Working Time Directives are monitored and strictly adhered to – **no more 'midnight moonlighters'!**

### CONSULTANT RADIOLOGISTS

Experience counts! Don't trust your patient's lives to companies who use less qualified reporters for their own commercial interests.

The most comprehensive reports come from experienced, sub-specialist consultant radiologists and **TMC never substitute with registrars or radiographers.**

We have the strictest recruiting policies on the market, ensuring only the 'cream of the crop', GMC registered sub-specialist radiologists are allowed to sign their name on the bottom of TMC reports.

### STRICTER GATEKEEPING

Poor gatekeeping is poor radiology – costing scarce public funds and increasing the public radiation burden.

TMC's Sydney radiologists are paid full-time salaries – **never based on the number of scans reported.**

This means there is **no personal financial incentive to accept cases outside of Trust conventions and protocols** - resulting in stricter control of case numbers and preventing unnecessary cost and patient irradiation.

## THE TMC ON-CALL ADVANTAGE

### INNOVATIVE OVERNIGHT 'DAYTIME' REPORTING FROM SYDNEY

This allows **better communication** with hospital staff, **real-time collaboration** amongst radiologists and **reduced costs**.

### FAST TURNAROUND TIME

TMC On-Call offers **verbal and written reports in under 30 minutes** for very urgent cases and less than 60 minutes for all other cases.

### INDEPENDENTLY AUDITED

TMC is the UK's only teleradiology company to employ **independent external auditors**, ensuring the greatest quality assurance on the market.

### ADDITIONAL REPORTING CAPACITY FOR THE NHS

Our radiologists work daytime shifts in Australia, not extra 'on-call' shifts from the UK. This results in increased on-call reporting capacity, **in full compliance with European Working Time Directives**.

### TMC OPTEMIS™ RIS

Provides real-time case management, live image-transfer status and HL7 **RIS-RIS integration**.

### 100% DATA SECURITY

**ALL patient data is fully anonymised** before being sent to Australia via our 256-bit encrypted network and purpose built RIS.

### 24 HOUR IT BACK-UP SUPPORT WHENEVER YOU NEED IT

We provide **24h IT support via our local UK number**. After hours support is provided from the Australian head office, so our trained professionals will be wide awake and ready to take your call whenever you need them.
